

# Guidelines for Programming Assignments

COSC 462

September 15, 2024

1. A program that does not compile will receive no credit.
2. A parallel program that compiles but does not execute on 1(or more) processor(s) will receive at most 10% of total possible score for that program.
3. A parallel program that compiles, executes on 1 processor but does not execute on more than 1 processor will receive at most 20% of total possible score for that program.
4. A parallel program that compiles, executes correctly on 1 processor but does not execute correctly on more than 1 processor will receive at most 30% of total possible score for that program.
5. A parallel program that compiles, executes correctly on 1 processor as well as more than 1 processor will receive at least 40% of total possible score for that program.
6. ONLY use `MPI_Wtime()` to record execution time of a code or any of its fragment(s).
